CONTENTS VOLUME 41, 1979

Review Paper

A review of data estimation procedures and associated errors
T.A. McMahon (Clayton, Vic., Australia) 1

Research Papers

A finite-element model of overland and channel flow for assessing the hydrologic impact of land-use change
B.B. Ross, D.N. Contractor and V.O. Shanholtz (Blacksburg, Va., U.S.A.) . . . 11
Seepage streams out of canals and ditches overlying shallow water tables
J.C. Bruch, Jr. (Santa Barbara, Calif., U.S.A.) 31
Determination of hydrodynamic dispersion coefficients using "inverfc"
P. Basak and V.V.N. Murty (Ludhiana, India) 43
Analytical solutions to the problems of transient drainage through trapezoidal embankments with Darcian and non-Darcian flow
P. Basak (Trivandrum, India) and M.R. Madhav (Kanpur, India) 49
Mass transfer in porous media with immobile water
F. de Smedt (Brussels, Belgium) and P.J. Wierenga (Las Cruces, N.M., U.S.A.) . . 59
An electronic analog for unsaturated flow and accumulation of moisture in soils
G.P. Wind and A.N. Mazee (Wageningen, The Netherlands) 69
An application of cosmic-ray neutron measurements to the determination of the snow-water equivalent
M. Kodama, K. Nakai, S. Kawasaki and M. Wada (Tokyo, Japan) 85
Effet du pourcentage et de la distribution des surfaces boisées sur les crues de fonte de neige (Effect of the percentage and distribution of forested areas on snow-melt runoff)
R. Charbonneau, G. Morin et J.P. Fortin (Québec, Qué., Canada) 93
A technique for the direct measurement of water storage on a forest canopy
N.H. Hancock and J.M. Crowther (Glasgow, Great Britain) 105
Occurrence of groundwater in the Satpura Hills region of central India
V.W. Uhl, Jr. (Annapolis, Md., U.S.A.) 123

Technical Note

The design of a portable rainfall simulator infiltrometer
A.S. Tricker (Dundee, Great Britain) 143

Short Communications

Evaporation of water from sand: the effect of evaporation on the precipitation of salts dissolved in water stored in sand
D.H.R. Hellwig (Windhoek, South West Africa/Namibia) 149
Some observations on the periodic variations of moisture in stabilised and unstabilised sand dunes of the Indian Desert
J.P. Gupta (Jodhpur, India) 153
The range of water temperature fluctuations in the limestone waters of the central and southern Pennines
A.F. Pitty (Cottingham, Great Britain), R.A. Halliwell (Hull, Great Britain),

J.L. Ternan (Plymouth, Great Britain), P.A. Whittel (Birkenhead, Great Britain) and R.G. Cooper (Keele, Great Britain) 157
Direct optimization of Muskingum routing coefficients — An extension to the paper by Gill, M.A., 1978. *Flood routing by the Muskingum method. J. Hydrol., 36: 353—363*
D. Stephenson (Johannesburg, South Africa) 161

Discussions

Flood routing by the Muskingum method — Comments
P.J. Meehan (Ottawa, Ont., Canada) 167
Flood routing by the Muskingum method — Reply
M.A. Gill (Zaria, Nigeria) 169
Determination of aquifer parameters by a two-well pulsed method using radioactive tracers — Comments
A. Kreft and A. Zuber (Cracow, Poland) 171
Determination of aquifer parameters by a two-well pulsed method using radioactive tracers — Reply
M. Ivanovich (Harwell, Great Britain) and D.B. Smith (Swindon, Great Britain) . 177
Unbiased plotting positions — A review — Comments
A. Garcia (Cordoba, Spain) 183

Author's Note

Modelling of surface runoff systems by an ARMA model — A correction
S.K. Spolia and S. Chander (New Delhi, India) 187

Book Reviews

Flood Studies Report, Volumes I—V (NERC publication) — M.F. Garrick 189
Statistical Methods in Hydrology by C.T. Haan — J.C. Davis 190
Drainage Basin Morphology by S.A. Schumm (Editor) — C.P. Green 192
Groundwater Quality — Measurement, Prediction and Protection (Water Research Centre publication) — D.W. Rycroft 193
Hydrogéologie de la Craie du Bassin de Paris (publication du B.R.G.M.) — L. Calembert 194
Management and Law for Water Resources by L.V. Cunha, V.A. Figueiredo, M.L. Correia and A.S. Concalves — J.H. Snyder 195

Announcement 197

Forthcoming Events 198

Research Papers

Environmental isotopes in a study of the origin of salinity of groundwater in the Mexicali Valley
B.R. Payne, L. Quijano (Vienna, Austria) and C. Latorre D. (Mexico City, Mexico) 201
Hydrological applications of noble gases and temperature measurements in underground water systems: examples from Israel
O. Herzberg and E. Mazor (Rehovot, Israel) 217
Inert gases in groundwater from the Bunter Sandstone of England as indicators of age and palaeoclimatic trends

J.N. Andrews and D.J. Lee (Bath, Great Britain) 233
Simultaneous transport of water and reacting solutes through multilayered soils under transient unsaturated flow conditions
A.B. Gureghian (Argonne, Ill., U.S.A.), D.S. Ward (Oak Ridge, Tenn., U.S.A.) and R.W. Cleary (Princeton, N.J., U.S.A.) 253
Pore size distribution — a factor to be considered in infiltration studies?
S.W. Baker (London, Great Britain) 279
Diurnal variations in stream discharge and throughflow during a period of low flow
T.P. Burt (Huddersfield, Great Britain) 291
Minimum stream power and river channel patterns
H.H. Chang (San Diego, Calif., U.S.A.) 303
The sensitivity of parameters in the Penman evaporation equations and direct recharge balance
K.W.F. Howard and J.W. Lloyd (Birmingham, Great Britain) 329
The estimation of groundwater recharge
K.R. Rushton and C. Ward (Birmingham, Great Britain) 345

Technical Note

The "evaporation brush", an evaporimeter for measuring the potential evaporation of meadow grass
C.L. Palland (Arnhem, The Netherlands) 363

Short Communications

Statistical relationships of water flow parameters with soil matrix and porosity properties
V. Murali, G.S.R. Krishna Murti and A.K. Sinha (New Delhi, India) 371
An analytical solution for the transient ditch drainage problem
P. Basak (Trivandrum, India) 377

Discussions

Stream flow simulation — A model based on cannonical expansions — Comments
Huynh Ngoc Phien (Bangkok, Thailand) 383
Stream flow simulation — A model based on cannonical expansions — Reply
S.K. Spolia and S. Chander (New Delhi, India) 385
A layered infiltration model for homogeneous soils — Comments
W.J. Bond and N. Collis-George (Sydney, N.S.W., Australia) 387
A layered infiltration model for homogeneous soils — Reply
M.A. Gill (Zaria, Nigeria) 391

Book Reviews

Stormwater Management, Quantity and Quality by P.M. Wanielista — C.H.R. Kidd . 393
Hillslope Hydrology by M.J. Kirkby (Editor) — M.P. Anderson 394
Finite Elements in Water Resources by W.G. Gray, C.F. Pinder and C.A. Brebbia (Editors) — R.T. Clarke 395
